

PROJECT 1: DESK FITNESS APP UX RESEARCH

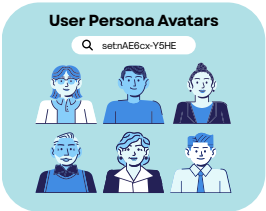

An ultra-accessible desk fitness companion designed for busy office professionals to relieve physical strain and build consistent health habits via 5-minute micro-workouts, right at their workstation.

USER PERSONA

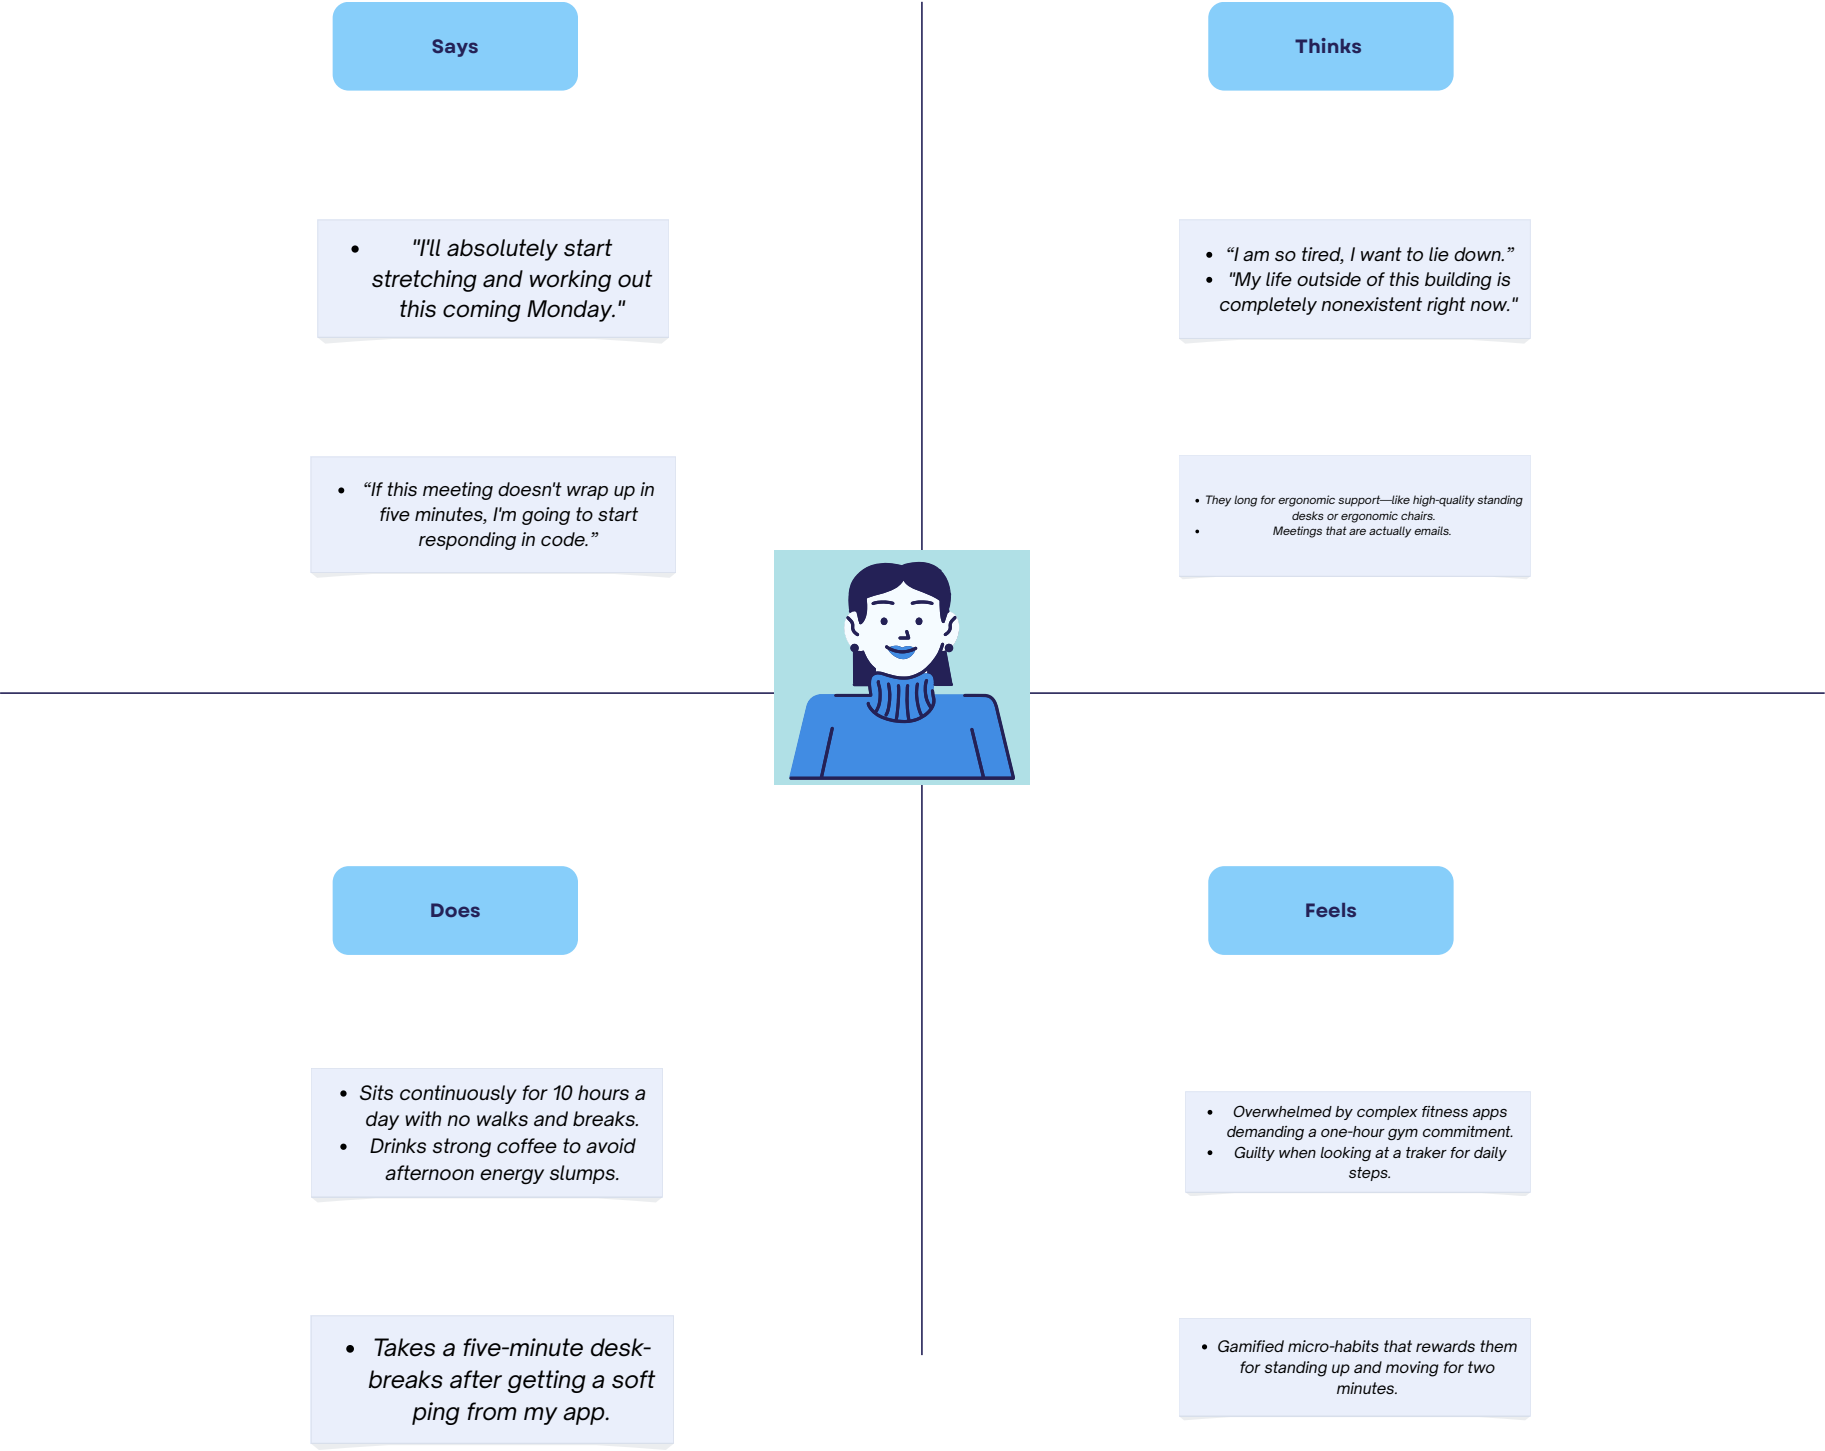

Sarah
32
Remote Software Engineer

Works 45+ Hours/week
Sits at a desk 10 hours a day
Low physical activity per day

THE EMPATHY MAP

User Insight

Pains

- *Time Poverty: Back-to-back meetings leave zero open calendar slots for long workouts.*
- *Mental Exhaustion: Too drained by 6:00 PM to make decisions about exercise routines.*

- *High Friction: Standard fitness apps require changing clothes, gym travel, or heavy equipment.*
- *Screen Lock: Becoming so deeply focused on work that hours pass without standing up.*

Gains

- *Desk Pain Relief: Alleviating neck strain and lower back stiffness directly at their workstation.*
- *Micro-Habit Success: Building a consistent routine through effortless 5-to-10 minute movement windows.*

- *Sustained Energy: Fighting off the afternoon brain fog and energy slumps without relying on extra coffee.*
- *Guilt-Free Workdays: Feeling healthy and active without having to sacrifice work productivity or personal downtime*
